

ABSTRACT OF THE DISCLOSURE

An all-terrain vehicle (ATV) includes a frame and a pair of front and rear wheels suspended from the frame. A straddle-type seat has a main portion and a secondary portion to accommodate a driver and a passenger. The straddle-type seat is constructed and arranged such that, in use, a center of gravity of the passenger sitting in a standard riding position on the secondary seat portion is disposed in front of the axis of the rear wheels.
